INSTITUTO NACIONAL DE PESQUISAS ESPACIAIS

## Content

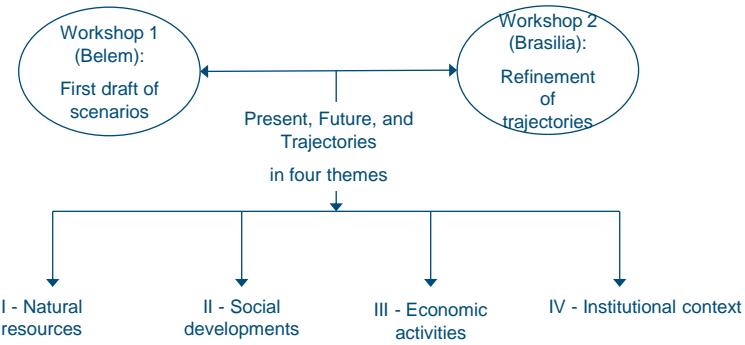

---

- Overview of methods and results of first workshop in Belém
- Main results of CLUE modelling

ALTERRA  
WAGENINGEN UR

## General framework of workshops

Participants:

Civic society and the productive sector (first workshop); Government and science (second workshop)

Central questions:

What could the future look like in 2050 and what would be plausible ways to reach it?

What are crucial trade-offs, differences, and necessary actions to be taken?

## First stakeholder workshop - Main objective

Develop alternative scenarios for the future of the Brazilian Amazon in 2050 with representatives from different sectors of society.

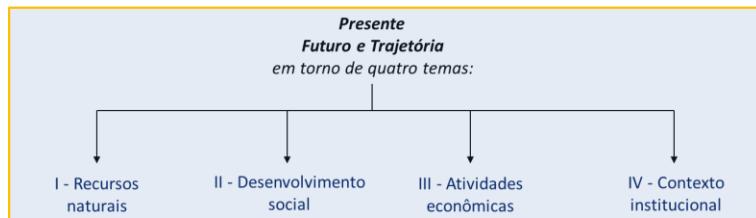

## Workshop participants

Instituição (Abreviação)	Instituição (Nome completo)	Site	Nome do(s) representante(s) na oficina
1 ABC	Associação Brasileira de Criadores	<a href="http://www.abccriadores.org.br">www.abccriadores.org.br</a>	Helio Madalena Jr
2 ABIOVE	Associação Brasileira da Indústria de Óleos Vegetais	<a href="http://www.abiove.org.br">www.abiove.org.br</a>	Bernardo Pires
3 ABRAFRIGO*	Associação Brasileira dos Frigoríficos	<a href="http://www.abrafrigo.org.br">www.abrafrigo.org.br</a>	Gil Reis
4 AIMEX	Associação da Indústria dos Exportadores de Madeira do Pará	<a href="http://www.aimex.org.br">www.aimex.org.br</a>	Gilberto Carvalho
5 ALCOA	Alcoa Alumínios S.A.	<a href="http://www.alcoa.com.br">www.alcoa.com.br</a>	Milene Maués
6 CIMI*	Conselho Indigenista Missionário	<a href="http://www.cimi.org.br">www.cimi.org.br</a>	Marcos Borges ou Claudemir Monteiro
7 CNS	Conselho Nacional da Populações extrativistas	-	Manoel Silva da Cunha
8 CPT*	Comissão Pastoral da Terra	<a href="http://www.cpt.org.br">www.cpt.org.br</a>	Padre Paulinho
9 CTA e CCM	Centro de Trabalhadores da Amazônia e Comitê Chico Mendes	<a href="http://www.cta.org.br">www.cta.org.br</a>	Julia Feitosa da Silva Dias e Marcos Jorge Dias
10 FAEPA*	Federação de Agricultura e Pecuária do Pará	<a href="http://www.faeapa.org.br">www.faeapa.org.br</a>	Dr. Carlos Xavie
11 FASE	FASE - Educação e Solidariedade	<a href="http://www.fase.org.br">www.fase.org.br</a>	Graca Costa
12 FNBF*	Fórum Nacional de Atividades de Base Florestal	<a href="http://www.forumflorestal.org.br">www.forumflorestal.org.br</a>	Guilherme Carvalho
13 FSC/IFT	Instituto Floresta Tropical	<a href="http://www.ift.org.br">www.ift.org.br</a>	Marcos Lentini
14 FVPP	Fundação Viver Produzir e Preservar	<a href="http://www.fvpp.org.br">www.fvpp.org.br</a>	Diego Luiz do Nascimento
15 GREENPEACE	Greenpeace	<a href="http://www.greenpeace.org">www.greenpeace.org</a>	Edwin Keiser
16 IEB	Instituto Internacional de Educação do Brasil	<a href="http://www.ieb.org.br">www.ieb.org.br</a>	Manuel Amaral
17 ISA	Instituto Socio Ambiental	<a href="http://www.isa.org.br">www.isa.org.br</a>	Renata Alves
18 TNC	The Nature Conservancy	<a href="http://www.tnc.org">www.tnc.org</a>	Iam Thompson
19 SAE	Secretaria de Assuntos Estratégicos	<a href="http://www.sae.gov.br">www.sae.gov.br</a>	Arnaldo Carneiro
20 VALE	Vale S.A.	<a href="http://www.vale.com">www.vale.com</a>	Leonardo Neves ou Francinaldo Magno

## Present and future scenarios

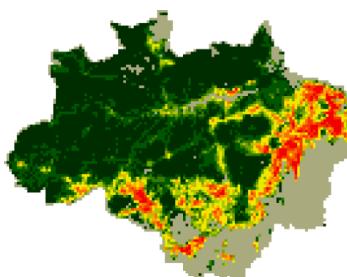

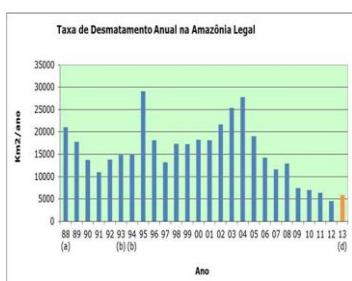

### Results of the first workshop

### ACTUAL SITUATION

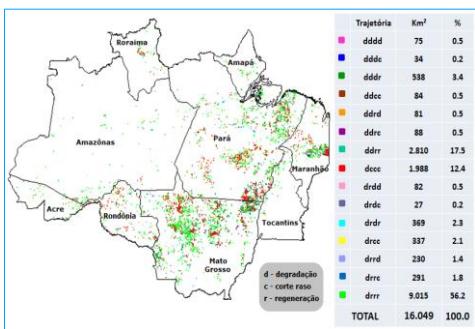

### Current situation - natural resources

- Deforestation declining(?)
- 18% of pristine rainforest converted
- High percentage of degraded forest
- Many extreme events

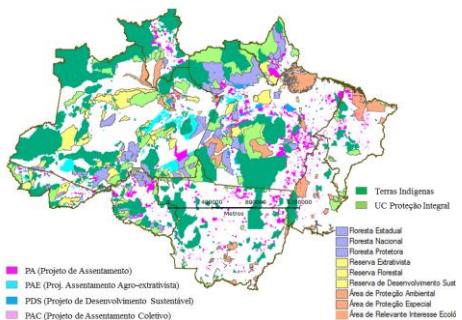

## Current situation - natural resources

### Degree of degradation

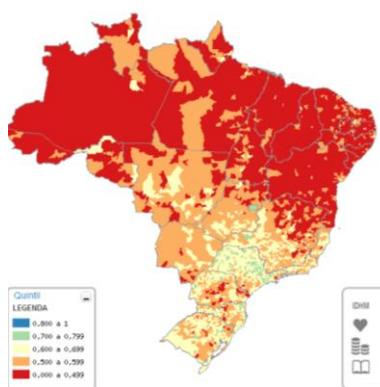

### Conservation Units

Mosaic of Territory Units: Protected Areas and Settlements in 2010

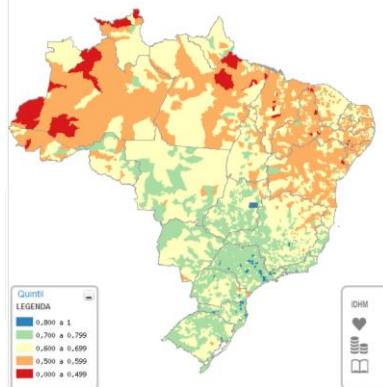

## Current situation - social

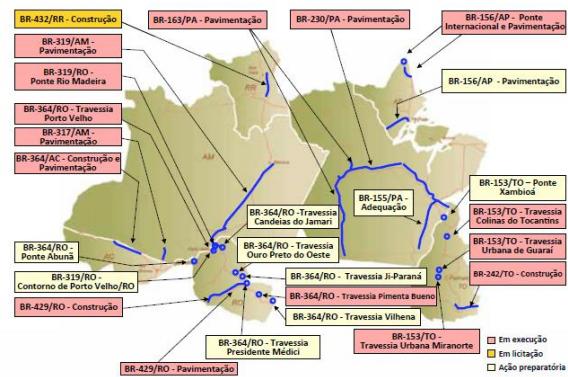

### Human development index 2000

### HDI 2010

## Current situation - infrastructure

## Future scenarios - natural and social

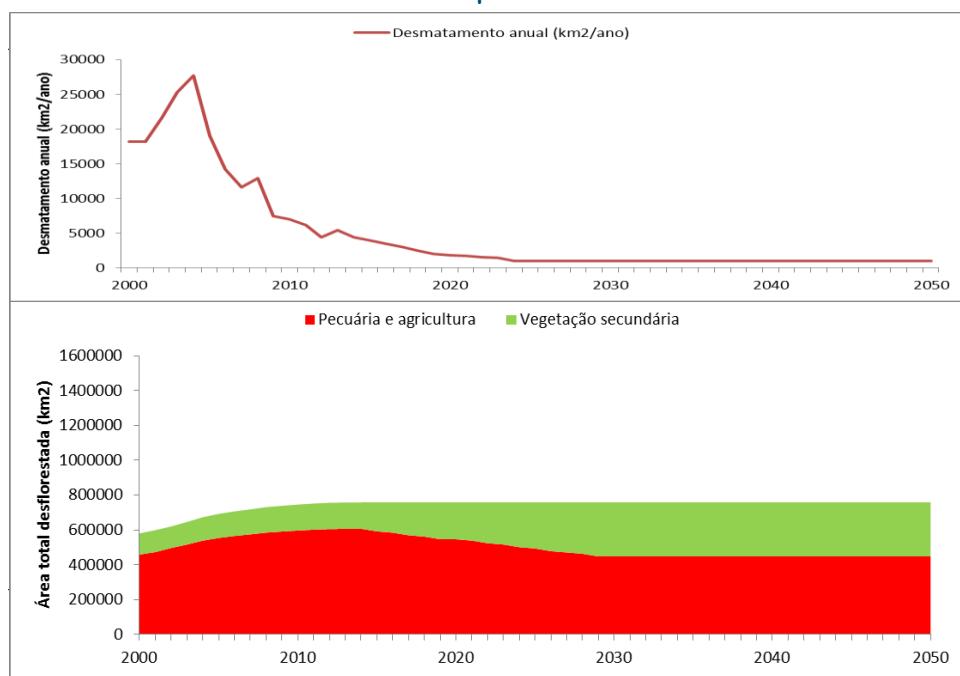

THEME	CURRENT SITUATION	SUSTAINABILITY	FRAGMENTATION
Natural Resources	Deforestation declining, but number of new openings remains constant  Displacement of deforestation fronts to the Tapajos region, for example (soy, infrastructure, and zoning).	Legal and illegal clear-cut cutting zero.  80% forest cover remaining everywhere.	In 2050, the total deforested area will reach 30-40%.  Degraded forest remnants without biological corridors with deteriorated ecological functions.
Social development	Widespread urban and rural violence	Settlements with structured management, relocated to peri-urban areas in order to meet demand for food in the cities	Increase in land conflicts and increasing slums of big cities.

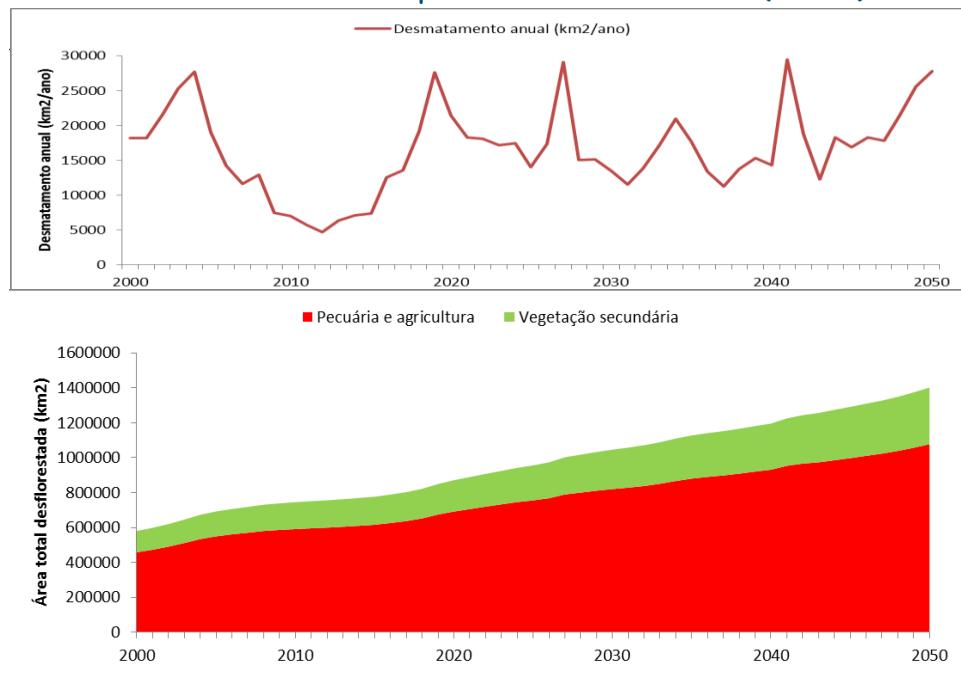

## Future scenarios - economic and institutional

THEME	CURRENT SITUATION	SUSTAINABILITY	FRAGMENTATION
Economic activities	There is an invisible economy which hides poverty and number of employed people.	Low-carbon agriculture widely practised  Sustainable forest management using native species	Wood demand will be satisfied mostly by reforestation.  Economy oriented to international markets
Political and institutional context	Weakening of environmental legislation to facilitate large projects (pressure of the productive sector).  Trend toward increasing awareness of the environment, the place where one lives, including by the companies.	Land tenure documented and complete environmental control with fully operational systems.  Centres of education and research for local people, focusing on the use of natural resources	Breakdown of regulatory frameworks favouring economic interests only.  Internationalization of the Amazon, but with fragmentation of states and consequent pressure on forest areas.

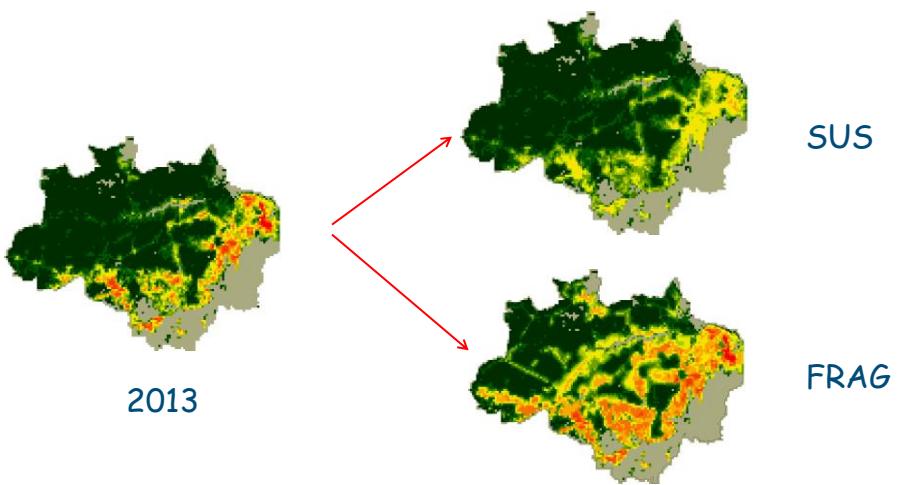

## Future scenarios - input for land use model

### Future scenarios - input for land use model (FRAG)

### Future scenarios - output land use change model

## Future scenarios - impacts
